

**AMENDMENTS TO THE CLAIMS**

The listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Canceled)
2. (Canceled)
3. (Canceled)
4. (Currently Amended) ~~The method as described in claim 4~~ A method of handling travel arrangements, said method comprising:  
scheduling the travel arrangements using a computer system;  
recording the scheduled travel arrangements on a nonvolatile storage device connected to the computer system; and  
sending one or more automated requests corresponding to the travel arrangements from the computer system to one or more service agents, wherein the automated requests are based on a traveler's user profile, and wherein at least one of the service agents are selected from the group consisting of a delivery service agent, a telephone system, an electronic calendar system, and a medical information system;  
 wherein the delivery service agents ~~include~~ agent includes one or more parcel services, and  
 wherein the automated requests include one of holding packages for customer pickup, delivering packages on a future date, and leaving packages with a neighbor.
5. (Currently Amended) ~~The method as described in claim 4~~ A method of handling travel arrangements, said method comprising:

scheduling the travel arrangements using a computer system;

recording the scheduled travel arrangements on a nonvolatile storage device connected to the computer system; and

sending one or more automated requests corresponding to the travel arrangements from the computer system to one or more service agents, wherein the automated requests are based on a traveler's user profile, and wherein at least one of the service agents are selected from the group consisting of a delivery service agent, a telephone system, an electronic calendar system, and a medical information system;

wherein the delivery service agent includes a post office, and

wherein the automated requests include at least one of holding mail for customer pickup, delivering mail on a future date, and forwarding mail to another address.

6. (Canceled)

7. (Currently Amended) ~~The method as described in claim 4~~ A method of handling travel arrangements, said method comprising:

scheduling the travel arrangements using a computer system;

recording the scheduled travel arrangements on a nonvolatile storage device connected to the computer system; and

sending one or more automated requests corresponding to the travel arrangements from the computer system to one or more service agents, wherein the automated requests are based on a traveler's user profile, and wherein at least one of the service agents are selected from the group consisting of a delivery service agent, a telephone system, an electronic calendar system, and a medical information system;

wherein the service agents include one or more of the telephone systems and wherein the sending automated requests include configuring instructions corresponding to a telephone.

8. (Original) The method as described in claim 7 wherein the configuring requests include at least one of changing a voicemail greeting, forwarding calls received at a first phone number to a second phone number, transferring a caller to an alternate phone number, and providing the caller with an emergency contact.
9. (Original) The method as described in claim 7 further comprising:  
  
registering the telephone with an email system prior to the configuring, wherein the registering includes sending a message to the email system.
10. (Previously Presented) The method as described in claim 7 wherein the transferring further includes:  
  
setting a backup contact name, wherein the backup contact name corresponds with an alternate phone number; and  
  
receiving a predefined signal from a calling telephone requesting the transferring to the alternate phone number.

12. (Canceled)
13. (Canceled)
14. (Currently Amended) ~~The method as described in claim 1 further comprising:~~ A method of handling travel arrangements, said method comprising:  
  
scheduling the travel arrangements using a computer system;  
  
recording the scheduled travel arrangements on a nonvolatile storage device connected to the computer system;

sending one or more automated requests corresponding to the travel arrangements from the computer system to one or more service agents, wherein the automated requests are based on a traveler's user profile, and wherein at least one of the service agents are selected from the group consisting of a delivery service agent, a telephone system, an electronic calendar system, and a medical information system;

receiving the automated request at the medical information system; and

downloading destination related medical information to a computing device that is accessible by a user in response to the received request.

15. (Original) The method as described in claim 14 wherein the medical information corresponds with one or more medical services offered at a travel destination.

27. (Currently Amended) ~~The information handling system as described in claim 18~~  
~~further comprising:~~ An information handling system comprising:

one or more processors;

a memory accessible by the processors;

a nonvolatile storage device accessible by the processors; and

a travel automation tool, the travel automation tool including:

means for scheduling travel arrangements using a computer system;

means for recording the scheduled travel arrangements on the nonvolatile storage device;

means for sending one or more automated requests corresponding to the travel arrangements from the computer system to one or more service agents, wherein the automated requests are based on a traveler's user profile, and wherein at least one of the service agents are selected from the group consisting of a delivery service agent, a telephone system, an electronic calendar system, and a medical information system;

means for receiving the automated request at a second information handling system;

means for searching a database connected to the second information handling system for requested information; and

means for downloading destination related medical information resulting from the searching to a computing device that is accessible by a user.

30. (Canceled)

31. (Canceled)
32. (Currently Amended) ~~The computer program product as described in claim 28~~ A computer program product stored in a computer storage media, the computer storage media containing instructions for execution by a computer, which, when executed by the computer, cause the computer to implement a method for handling travel arrangements, said method comprising:  
scheduling the travel arrangements using a computer system;  
recording the scheduled travel arrangements on a nonvolatile storage device connected to the computer system; and  
sending one or more automated requests corresponding to the travel arrangements from the computer system to one or more service agents, wherein the automated requests are based on a traveler's user profile, and wherein at least one of the service agents are selected from the group consisting of a delivery service agent, a telephone system, an electronic calendar system, and a medical information system;  
wherein the service agents include one or more of the telephone systems and wherein the sending automated requests include configuring a telephone based on the automated requests.

38. (Currently Amended) ~~The method of claim 1~~ A method of handling travel arrangements, said method comprising:

scheduling the travel arrangements using a computer system;

recording the scheduled travel arrangements on a nonvolatile storage device connected to the computer system; and

sending one or more automated requests corresponding to the travel arrangements from the computer system to one or more service agents, wherein the automated requests are based on a traveler's user profile, and wherein at least one of the service agents are selected from the group consisting of a delivery service agent, a telephone system, an electronic calendar system, and a medical information system;

wherein one of the automated requests results in increasing a user's electronic wallet balance and decreasing a user's bank account balance, the user corresponding to the travel arrangements.

39. (Canceled)

40. (Canceled)

41. (Currently Amended) ~~The method as described in claim 1 further comprising:~~ A method of handling travel arrangements, said method comprising:

scheduling the travel arrangements using a computer system;

recording the scheduled travel arrangements on a nonvolatile storage device connected to the computer system;

sending one or more automated requests corresponding to the travel arrangements from the computer system to one or more service agents, wherein the automated requests are based on a traveler's user profile, and wherein at least one of the service agents are selected from the group consisting of a delivery service agent, a telephone system, an electronic calendar system, and a medical information system;

receiving the automated request at the electronic calendar system; and  
updating an electronic calendar maintained by the electronic calendar system  
with information related to the travel arrangements.
